FULL STACK DEVELOPER

As a full-stack developer with over a year of experience, I have solid foundation and passion for writing clean, efficient code. My experience includes designing and building web-based applications, working with both, front and back end technologies to deliver high quality products. I'm eager to grow and learn, use my problem-solving skills to improve continuously and contribute to the success of the projects that I work on.

TECHNICAL SKILLS

Languages : JavaScript, Typescript, Golang, HTML, CSS
Frameworks : React.js, Next.js, Express, Node.js, gRPC
Libraries : Styled-components, React Router, Axios,
Databases : MongoDB
Dev Tools : GraphQL, Git, Gitlab, Github, Linux

EXPERIENCE

Full-stack Developer

Dec 2022 – Present

Picnic

- On the backend, I utilized gRPC and Golang to build APIs for an admin panel. I leveraged microservices to build scalable and robust solutions to meet the needs of the application. **Golang, gRPC**
- I utilized React to create an intuitive and user-friendly interface for the admin panel. I used the APIs developed on the backend to display important information and functionality to the end-users. **React.js**

Full-stack Mentor

Sep 2022 – Present

Bitcamp

part-time

In bootcamp where I studied web-development, I was eager to learn and as it turns out, best way to learn is to teach. So after several months of studying I became a mentor

- Helping students solve problems on full-stack projects
